THE IDEAL LOCATION

For That New Home is In

Beautiful Gregory Heights

No matter what character of home you build, the location will mar or make its attractiveness. Gregory Heights is truly the ideal location in Paducah for a home. High, rolling ground that is easily drained; off, away from the dirt and grime and noise of the city; with the street car at your door; pure, bracing, health-giving fresh air in plenty, ALL the time; these are but few of its attractions.

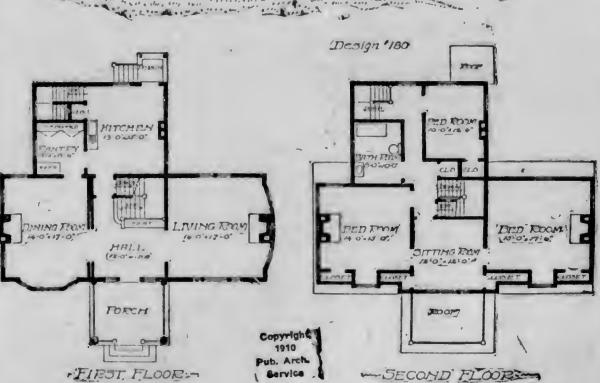

WE SELL ON EASY TERMS AND REASONABLE PRICES and should like to show you what we have for YOU.

HINTS FOR PROSPECTIVE BUILDERS

This is a great era of home-building in Paducah. Everybody seems to be reallizing that the best home is a home they own and have built us they want it. For the benefit of our readers who are considering building and are still undecided as to the style or price of home to build, we are, each week on this page, showing original, attractive and practical illustrations of modern moderate priced houses that will offer helpful suggestions and give a fairly necurate idea of what it will cost to build.

This Gambrel Roof Colonial Home for \$2,500

The design for today, though for a home of modest size, presents on attractive, Imposing appearance equal to many houses of greater size. This is occasioned by the fact that the plan, instead of running to depth, as is the usual plan, has is greatest proportion in width. As shown, this home is 44 feet wide and only 221/2 feet deep. The above est, mate is based on frame construction and includes bath, furnace und plumblug. Height of storles: First, 9 feet; second, 8 feet 6 luches.

The plan is for seven rooms and bath, not counting the reception hall, which could in itself be considered a fair-sized room.

This plan is especially pleasing because of its convenient arrangement throughout; for instance, in the first floor the well placed pantry connecting dhing room and kitchen, the large, homey, well-lighted I ving room, etc. The second floor sitting room will appeal to the woman. Note the abundance of closets,

t'omplete plans and spec'hications, in duplicate, for building this house may be secured from this office for \$25,00. For alterations making additions or reversing plans a slight charge will be made, dependent us to the amount of extra work involved.

NATURE'S BROOKPORT ENJOYS

fier, for it is the weakened, impure condition of the circu lation that is responsible for the run-down state of health. The supreme office and duty of the blood is to furnish nourishment to every portion of the body. The circulatory system, magnificent and wonderful in its construction, supplies the means for the distribution of systemie nutriment to every nusele, nerve, bone, gland, sinew and tissue of the body; and just as long as the blood remains pure and rich each of these members are healthy, strong and normal.

We have only to recognize the importance of pure blood in preserving health, to realize the danger of a weakened circulation. The use of a proper tonic when the system is depleted and run-down will often prevent the development of some serious sickness, because weak

Eystems cannot resist disease, while healthy systems are able to ward it off. Deficient blood nutriment is usually manifested in a general bodily weakness, a tired, worn-out feeling, fickle appetite, poor digestion, etc. Sleep does not sufficiently refresh the body, and the languid feeling frequently makes the ordinary duties of life burdensome

TONIC OF THE HIGHEST ORDER. **TONIC OF THE HIGHEST ORDER."

8. S. S. is all you claim for 1 to enrich and renovate the blood and to build up the general health. My blood was weeks and Impure, and I was troubled with a general letting down of the system. The symptoms are too well known for one to detail. It is only necessary for me to state that under the fine tonic and blood purifying effects of S. S. my appetite improved, I increated in strength and weight and my blood was restored to Ita normal, healthy condition.

DID THEY FIND BURIED TREASURE?

TWO MEN EXCAVATE HOLE, SET FOLKS TO GUESSING.

The strnnge appearance of two old trumps in the woods near Ninth and Bachman streets last Frblay and the results of their visit, disrovered the following day, has se goaslping tongues wagging ami the

formation of many theories. Whether the old men had recovered some hidden trensure or whether they were ex-couvicts returning to the spot where they had buried stolen treasurers years ngo are two of the most dominaut

Last Friday morning the mysteri our pair were seen in the wood back of linchman street on the Leibel property. They walked over the ground mysterlously and in the afternoon were seen taking measurements. Finally they arrived at a spot where they seemed to be eathelied and left. The following morning unrious people who had seen the tramps the previous day went into the woods und were startled to find a freshly dag ditch at the bottom of which was the imprint of a jar in the damp clay Patrolman John Hemian began in ve tigating and went as far as t mea are the hole, which was 3 fee in width, 7 feet long and 6 fee

The Imprint of the jar was Inches in circumference. The spot where the jar was burled is exactly half way between two elm trees,

It is thought that the two tramps returned to the woods last Friday night and began digging about i o'clock, completing the ditch after midnight and then leaving. Th prequerty on which the jar wa buried is owned by Sam Leibel, itoti men were strangers and their visi there has set that section of the cit talking.

NEW FORM OF CITY GOVERNMENT

THOROPOHLY CONE OVER AT A MASS MEETING.

Selected to Secure Signers to Necessary Petition,

Lexington, Ky. June 21 .- Definite steps were taken at the mass meeting held at the court house Monday night at 7:30 o'clock looking to the inauguration of the campaign for the proposed commission form of gov ernment in Lexington.

While no direct announcement can be made as to what plan of organization will be followed, a campaign committee was selected to begin the work of securing the requisite number of signatures to the petition asking that the proposition for the establishment of the commission form be pinced on the bailots at the November election and to make other arrangements looking to the advancement of the movement,

Attorney Halley D. Berry, who was the official representative from Lexington at the Des Moines demonstra ion of the commission form of government, was one of the speakers at the meeting, telling of his trip and what he found out about the new gov

Mr. Berry stated that the Det Molnes plan la almost exactly what has been proposed for Lexington, and that everyone at that place endorses it. Des Moines was one of the first cities to put the new plan in operation, and there, he says, it is complete success.

Why Have an Overheated **Kitchen in Summer?**

When the sultry days come and the coal range makes the kitchen almost unbearable and cooking a dreaded task, put out the range fire and try the newest method of cooking in hot weather—use a

New Perfection

What a contrast! The kitchen no longer is stifling hot, the work is now done with comfort, and the housewife is not worn out with the heat.

She saves her strength, keeps her health and is better able to enjoy the summer.

Tha New Perfection does everything that any other stove can do-all the family cooking, baking, washing and iron-ing. No smoke, no dust, no odor. Heat is applied directly and not wasted. A turn, and the flame is out.

The New Perfection stove has a Cabinet Top with shelf for keeping plates and food hot, drop shelves for the coffee pot or saucepens, and nickeled towel racks.

It has long turquoise-blue enamed chimneys. The nickel finish, with the bright blue of the chimneys, makes the stove very attractive and invites clean-liness. Mads with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

No. 2. Comfort

DURING the hot days, comfort is an all important factor, and comfort in the kitchen is especially desirable. You are denying yourself this comfort if you are not cooking with Gas. Discard your coal range, install a gas range in its place and do away with heat and discomfort you are now putting up with.

> Surely you must agree that the COMFORT of gas is unsurpassed by any other fuel.
